

[Deep Bodywork 2-year Advanced Training](#)

- with specialisation in Postural Integration®

January 2018 to August 2020

The course consists of 33 days in year one and 38 days in year two (altogether 532 in-class training hours).

This two year course is an Advanced Training in Deep Bodywork – with specialisation in Postural Integration. It combines intensive personal experience with theoretical and practical training.

The course is for people who want to become skilled at working deeply with the bodymind, both their own and their clients'. It follows on from the [1-year Foundation in Deep Bodywork](#) and develops that with a thorough 2-year training in process-oriented, relational bodywork and body-psychotherapeutic techniques, including touch. This course can be a powerful supplementary training in how to work deeply with bodymind for practitioners of other bodywork/therapy modalities and for psychotherapists wishing to enhance and extend their current practice.

In this Advanced Training in Deep Bodywork we continue the combination and interrelation of experiential, theoretical and practical material, which allows knowledge and understanding to be gained through these three channels, and thus be integrated much deeper.

After successful completion of this 2-year Advanced Training in Deep Bodywork, participants wishing to become Deep Bodywork Practitioners

(and/or Certified Postural Integrators), can enter a [1-year Certification Phase](#) after completion of the 2-year Advanced Training, working with clients under supervision and taking part in professional support and development weekends.
